2pm-3pm

Behan Planning & Design
presentation

Summit Lake and its
Watershed: Restoration of
Philmont's Natural Legacy

Behan Planning and Design will present the findings of six reports and studies conducted over the last two years defining what is causing the island (delta) growth at the easterly inlet, the increase of invasive plant growth, and the silt build up contributing to the overall demise of Summit Lake (aka The Reservoir) and what can be done to start the restoration.

All are welcome!
